

PREP

Science

This semester, students in Prep show familiarity with digital systems and use them for a purpose. They represent data using objects, pictures and symbols and identify examples of data that is owned by them.
(Experience only – not assessed)

Maths

This term, students will focus on counting to and from 20 and ordering small collections. They will also compare objects using mass, length and capacity.

English

This term, students will read short, decodable texts and use strategies to make meaning from the texts. They will also demonstrate their knowledge about beginning writing behaviours. They will identify and describe their likes and dislikes and learn that texts can reflect own experiences.

HASS

Not assessed in this semester

The Arts

Not assessed in this semester

Technologies

Students describe the observable properties of the materials that make up objects.
(Experience only – not assessed)

Health and PE

Students will apply fundamental movement skills to manipulate objects and space in a range of movement situations.

Term 2,
2024

This is a curriculum snapshot for the learning and assessment in Prep.
