

# Year 4

## Science

This term, students will examine the properties of natural and made materials including fibres, metals, glass, and plastics and consider how these properties influence their use.

## Maths

This term, students will choose appropriate strategies for calculations involving multiplication and division. They will recall multiplication facts to  $10 \times 10$  and related division facts. They will also use scaled instruments to measure temperatures, lengths, shapes and objects and compare areas of regular and irregular shapes using informal units. Students will also identify dependent and independent events and list the probabilities of everyday events.

## English

This term, students will analyse and read texts. They will explore the text structures within the texts. Students will write a text persuading an audience for or against the following statement: Do kids need mobile phones?

## HASS

Not assessed in this semester

## The Arts

Not assessed in this semester

## Technologies

Students will explore how digital technologies have evolved over time, how these technologies function and the similarities and differences between them. Students will also beginning to learn about cyber safety and cyber etiquette in their online interactions.

## Health and PE

Students will apply fundamental movement skills and demonstrate movement concepts across a range of situations. They will also adapt movement strategies to enhance movement outcomes.

Term 2,  
2024

This is a curriculum snapshot for the learning and assessment in Year 4.
