

CURRICULUM SNAPSHOT

Year 1

*Term 2
2025*

English

Students engage with a range of informative texts that report and describe topics of interest and learning area content. Imaginative texts with related themes and topics are chosen to complement these texts.

They read, view and comprehend texts including simple decodable texts aligned with phonic development, and authentic texts including picture books, poems and narrative texts.

Through texts, students explore how print and digital informative texts such as reports and factual descriptions use text structures, language and visual features to suit their purpose.

Students compare these features with those in narrative texts to identify similarities and differences.

Students engage in shared and independent writing to create informative texts on familiar and learnt topics using simple sentences with sentence boundary punctuation, some topic-specific vocabulary and correct spelling of some one- and two-syllable words.

Maths

Prime Maths is a world class program based on top-performing schools in Singapore, Republic of Korea and Hong Kong. The program covers the six strands of mathematics: Number, Algebra, Measurement, Space, Statistics and Probability. It is aligned to the Australian Curriculum: Mathematics Version 9.

Science

Biological Sciences:

Students will identify how living things meet their needs in the places they live.

HASS

Not taught or assessed this semester

Health and PE

Students will apply fundamental movement skills in different situations and explain how they move with objects and in space effectively.

The Arts

Not taught or assessed this term

Technologies

Old vs. New: First Nations Design and Technologies
Students will learn how First Nations Designs and Technologies helped maintain and sustain their environment pre-colonisation, and how we can lean on this knowledge to create sustainable environments today.
