

CURRICULUM SNAPSHOT

Year 4

*Term 2
2025*

English

Students engage with a variety of texts including informative texts of increasing complexity and technicality. Texts by Australian, including First Nations Australian, and world authors should extend students as independent readers.

Texts may be about topics of interest or topics being studied in other learning areas. They include text-specific language features, varied sentence structures and some unfamiliar vocabulary.

Students explore how characteristic features of texts and the specific organisation of language serve the purpose of texts.

Students use texts as models to create and present a report.

Maths

Prime Maths is a world class program based on top-performing schools in Singapore, Republic of Korea and Hong Kong. The program covers the six strands of mathematics: Number, Algebra, Measurement, Space, Statistics and Probability. It is aligned to the Australian Curriculum: Mathematics Version 9.

Science

Biological Sciences: Australian Rainforests and living things

Students will identify the roles of organisms in a habitat and construct food chains.

HASS

Not taught or assessed in this term.

Health and PE

Students will examine factors that influence participation and propose strategies to incorporate regular physical activity into their own and others' lives. They will demonstrate fair play and inclusion through a range of roles in movement contexts.

The Arts

Not taught or assessed in their term.

Technologies

Sustainable Entertainment

Students will learn how the toy industry is beginning to use recyclable materials to design children's toys, in order to promote sustainability for the environment.
